

STEPS

1. Scan the QR Code to Download Artivive

- Use your phone's camera or a QR scanner app to scan the provided QR code.
- It will redirect you to the App Store (iOS) or Google Play Store (Android) to download Artivive.

2. Download and Install the App

- Tap on the Install button to download the Artivive app to your device.

3. Open Artivive

- After installation, open the Artivive app.

4. Sign Up or Log In (Optional)

- Create an account or log in if you'd like to access additional features, although it's not necessary for basic scanning.

5. Accept Terms and Permissions

- Review and accept the terms of use and privacy policy.
- Grant camera access if prompted.

6. Navigate to the Camera Interface

- Ensure you're on the main screen with the camera, ready for scanning (default mode in Artivive).

7. Hold Your Device Over the Provided Image

- Place your phone's camera so it clearly views the image you've been given to scan.

8. Align the Image in the Frame

- Position the image within the on-screen frame for accurate scanning. Ensure there's adequate lighting and minimal glare.

9. Experience the AR Content

- The app will recognize the image and display the augmented reality content over it.

10. Interact and Enjoy

- Observe or interact with the AR content. You can save or share it if the option is available.
